

Our office is now offering an alternative to dilation.

We can now take a photo of the inside of the eye, giving the doctor a permanent record for year to year comparison and also a tool; for diagnosing and treating certain time sensitive issues that may occur, as most eye diseases have no symptoms.

This photo however, is not a covered service by insurance.

There is a \$34 charge at the time of service

Yes, I would like the Fundus Photo _____

No, I prefer dilation _____

Name _____

Pt. ID # _____ **DOB** _____
